National Organizations

CDC awards funds to 12 national organizations to educate their constituents about breast and cervical cancers, to increase access to breast and cervical cancer screening among priority populations, and to develop strategies for reaching priority populations in collaboration with state health agencies.

American Association of Retired Persons (AARP)

AARP builds coalitions with many types of organizations to increase the number of women 50 and older who get annual mammograms and to educate older women about available options to pay for screening, including use of the Medicare mammography benefit.

Pat Johnston
Senior Program Specialist
AARP
601 E Street, NW
Washington, DC 20049
Voice (202) 434-2248
Fax (202) 434-6474

American Federation of Teachers Education Foundation (AFT)

The AFT project is committed to supporting programs that will enhance the health of women. The AFT Breast and Cervical Cancer project has developed several strategies including publishing information that describes the objectives of the project, cervical cancer and its detection, breast cancer and its detection and various information kits for members who request specific disease or treatment facts. The organization is cooperating with state health agencies in all sites to include them in the education and work site screening development.

Fax (202) 879-4597

American Indian Health Care Association, Inc.

Educational materials are being developed that are sensitive to the cultural norms of Native American women regarding the early detection of breast and cervical cancer. Computerized tracking systems are being developed which will be used to track Native American women with breast and/or cervical cancer. The software should provide all 36 urban Indian clinics with patient management reports as well as reports which indicate the incidence and prevalence of breast and cervical cancer. The software will also generate effectiveness reports for the clinics.

National Coalition of Hispanic Health and Human Service Organizations (COSSMHO)

COSSMHO has established the Salud Para Todas Task Force on the prevention of breast and cervical cancers among Hispanic women. The Task Force's objective is to improve access and delivery of comprehensive breast and cervical cancer screening services by linking with state and local health departments, Hispanic community-based organizations, and comprehensive cancer centers.

YWCA of the U.S.A.

The ENCORE-Plus program provides women with a spectrum of support services related to breast and cervical health including community outreach and education, referral to clinical screening services, and follow-up through diagnostic and treatment services. The YWCA of the U.S.A. also partners with Avon Products, Inc., through Avon's Breast Cancer Awareness Crusade. The Crusade is a multi-year, grassroots campaign to bring breast cancer education and access to early detection services to women nationwide, especially underserved, minority and older women.
